

The Neurodevelopmental Approach to Teaching

Plymouth State University's College of Graduate Studies has partnered with the Center for School Success (CSS) to create graduate programs focusing in the Neurodevelopmental Approach to Teaching – the **only programs of their kind in the country**. Students may complete a graduate certificate; a Master of Education in K-12 Education, Self-designed; or the Certificate of Advanced Graduate Studies (CAGS) in Educational Leadership.

For more information about **Neurodevelopmental Approach to Teaching** options, contact Plymouth State University's College of Graduate Studies at (800) FOR-GRAD, forgrad@plymouth.edu or visit plymouth.edu/graduate. For information on course registration, cost, course location, delivery options for schools/districts and pre-requisites, contact CSS: phone (603) 298-6700; Email: leslie.williamson@valley.net or visit: www.centerforschoolsuccess.org

About The Center for School Success: CSS is a non-profit organization, located in West Lebanon, NH, that helps struggling students achieve measurable success in school and in life. CSS offers learning assessments, professional development and outreach services. CSS services help students, their parents and teachers apply recent brain-based research findings to link *how* the student learns best with a plan for success. CSS bases its services on the work of Dr. Mel Levine, internationally-renowned developmental pediatrician and co-founder of the non-profit All Kinds of Minds Institute in North Carolina. Dr. Levine's work is founded on 30 years of research in cognitive neurosciences. CSS integrates this research with the current theories and best practices of multiple disciplines, including education, health and psychology. Learn more about CSS by visiting: www.centerforschoolsuccess.org.
